The Flavours of Korčula OKUSI OTOKA KORČULE

ONE ISLAND - ENDLESS EXPERIENCES
JEDAN OTOK - BEZBROJ DOŽIVLJAJA

Dear guests,

Welcome to the Island of Korčula – the island of Marco Polo, which will enchant you with its natural and cultural heritage. There are five administrative centres on the island: the town of Korčula and municipalities Lumbarda, Smokvica, Blato and Vela Luka. Discover each of them; enjoy wandering around streets shaded by old stone houses, the most romantic sunsets, the most beautiful beaches, unique sword dances, tasting top-quality local wine and extra virgin olive oil, sweeten your life with traditional cakes and sweets.

Dragi gosti,

Dobrodošli na Korčulu – otok Marka Pola, koja će vas očarati prirodnim ljepotama i bogatom kulturnom baštinom. Na otoku se nalazi pet administrativnih središta: Grad Korčula, Lumbarda, Smokvica, Blato i Vela Luka. Otkrijte svako od njih; uživajte u šetnji stoljetnim uličicama na koje sjene bacaju stare kamene kuće, najromantičnijem zalasku sunca, najljepšim plažama, jedinstvenim plesovima s mačevima, degustirajte vrhunska autohtona vina i korčulansko maslinovo ulje, zasladite se tradicionalnim slasticama.

The tradition of viticulture and winemaking on the island of Korčula dates back to the ancient Greeks (4th century BC). The island of Korčula is renowned for its autochthonous grape varieties and high-quality white wines. The variety of grk is cultivated in Lumbarda, on the east part of the island, while the varieties of pošip and rukatac are cultivated in the vineyards of Čara and Smokvica. Plavac mali is the most widely planted red wine variety.

Fertile fields, mild climate and the abundance of seafood are perfect for imaginative dishes with fresh ingredients close at hand. Enjoy the sunsets with a glass of high-quality wine made from autochthonous wine variety pošip or grk, rukatac which are perfectly paired with traditional meat or fish dishes.

Try prošek, a dessert wine traditionally produced from dried grapes of autochthonous varieties on the mainland and the islands of Dalmatia as well as fragrant brandies (rakija) made from herbs, carob and rose.

The mouth-watering delicacies are seasoned with olive oil from Korčula whose top quality has been confirmed with a geographical indication at the EU level. Olive oil tasting rooms are a must-visit for all healthy living enthusiasts.

Make sure you indulge your sweet tooth with Korčula-style desserts such as klašuni, cukarini, rozata, broštulani mindeli, arancini, sirnice, lojenice and lumblije with protected designation of origin.

Tradicija vinogradarstva i vinarstva na otoku Korčuli traje od vremena starih Grka (4. st. pr.Kr). Otok Korčula poznat je po autohtonim sortama grožđa i vrhunskim bijelim vinima. Grk se uzgaja u Lumbardi, na istočnom dijelu otoka, dok se u vinogradima Čare i Smokvice uzgajaju pošip i rukatac. Od crnih sorti najrašireniji je plavac mali.

Plodna polja, blagost klime i obilje morskih plodova kreirali su maštovita jela od namirnica nadohvat ruke. U zalazak sunca opustite se uz čašu vrhunskog vina autohtone sorte pošip ili grk rukatac koje se idealno sljubljuju s tradicionalnim mesnim ili morskim jelima.

Kušajte prošek, desertno vino koje se tradicionalno proizvodi u Dalmaciji i na otocima od presušena grožđa autohtonih sorti kao i mirisne rakije od trava, rogača i ruže.

Najukusniji zalogaji začinjani su korčulanskim maslinovim uljem čiju vrhunsku kvalitetu potvrđuje prestižna EU oznaka izvornosti. Kušaonice maslinovog ulja zasigurno su pravi izbor za poklonike zdravog načina života.

Ne propustite kušati tradicionalne korčulanske slastice koje će osvojiti vaša srca; klašune, cukarine, rozatu, bruštulane mindele, arancine, sirnice, lojenice i lumbliju koja nosi zaštićenu oznaku zemljopisnog podrijetla na nacionalnoj razini, te uskoro i na razini EU.

Za gurmane, otok Korčula je pravi izbor! Okušajte se u radionicama lokalne tjestenine „makaruna“ i tradicionalnih otočnih slastica, rezervirajte vrijeme za upoznavanje brižno čuvanih tradicija otoka. Popis proizvoda i njihovih proizvođača možete pronaći ovdje.
